### Infrastructure

**Class rooms:** In our department we have 15 rejuvenated lecture halls. The total size of lecture halls is about 1330.28 square metres. Nearly 65 students are accommodated in each of this class room. Effective learning process takes place in these well maintained lecture halls. These spacious lecture halls are sufficient enough not only for the lectures, but also to have various classroom activities. Students are highly motivated in various numbers of ways by making use of these lecture halls as an effective tool to make the learning process successful.

**Smart class room:** A well equipped advanced smart class room is maintained in our department to enrich the quality of teaching learning process visually efficient and effective. It is completely air-conditioned and furnished for 65 students with an area of 86 sq.m. A smart board, a power podium and a projector are provided.

**Drawing hall:** Our department has a huge drawing hall exclusively designed to improve the knowledge and the accuracy on the subject, Engineering Graphics with 65 tables and drawing boards with an area of 289.61sq.m. It is spacious enough for students to practice the drawing of Engineering Graphics. In addition to that, we have the same facility for another 220 students in the drawing hall located above the Central library.
**Training hall:** In our department, three training halls are furnished for a smaller group (30 students each) and are effectively used for the purpose of conducting various activities such as debate, group discussion, conversation and individual presentation, etc., to enrich their communication skill. It covers an area of 146.37 sq.m. One training hall is enhanced by wall mounted SONY LED 42” TV with Wi-Fi facility to develop the listening skill through videos and audios.

**Activity Based learning hall:** ABL hall gives a platform to our students in developing their soft skills. They are given enough training to overcome language barrier through communication skill. The classroom set up of ABL hall is very flexible in its seating arrangement to conduct various group activities with an area of 88.11 Sq.m.

**Seminar Hall:** Our department has a Seminar hall, which is well equipped with multimedia facility like PA system, LCD Projector and also special equipments for Presentation. It is completely air-conditioned and furnished for 150 students with an area of 173.10 Sq.m. It is effectively utilized as a discussion forum such as meetings, club events etc.

**Department Library:** Department of S&H has its own library consisting of nearly 4000 books related to Physics, English, Chemistry and Mathematics subjects for the benefit of the students and the staff members. Under the skill development scheme, the department library also provides magazines such as Auto Car, Electronics for You, Competition Success Review, GK Today, Electrical India, Data Quest and India Today and daily newspapers like The Hindu, The New Indian Express.

**Laboratories:** Labs with sufficient facilities can be availed by the students. Every lab has equipments with respect to the subjects in the curriculum.
**Language Lab:** Effective language education stems from offering variety of learning opportunities and tools. The sophisticated Language Lab consists of 60 systems. The nature and quality of the recorded materials, the length and the frequency of laboratory periods, the subtle but powerful factor of motivation are the variables on hand which help in efficient working of our Language Lab. Exquisite language proficiency boosting software like
- TOEFL Mastery,
- Globarena,
- Orell digital Language Lab (Odll),
- Clarity Snet Language Lab are installed here to confront interview with poise. B.E. & B.Tech. students attend this lab sessions regularly and their language skills are assessed in the end semester practical examination. The soothing atmosphere aids in evoking the students’ interest to listen and practice various software during 5p.m. to 6 p.m. in all working days. Further, the lab is efficiently utilized for conducting IELTS and BEC coaching classes and BEC online examination. It is also used to conduct online Exams like NPTEL and some Government Exams.

**Mathematics Lab:** The lab consists of 8 computers with LAN, Internet and Multimedia facilities. Students make effective use of this lab for aptitude training, online aptitude test and learning NPTEL online course. The lab is mainly used to develop and stimulate mathematical skills through analytical thinking among the young Engineers. Also the computers are installed with
- MAPLE software
- MAT LAB through which students become skilled and sure-footed at Engineering Mathematics.
**Physics lab:** With a well-equipped lab, the faculties of Physics department are assiduously making it possible for the students to realize the fundamentals of Physics in Engineering and Technology. Physics Laboratory is well ventilated and fully outfitted for present curriculum requirements. The Semiconducting Physics Lab provides a platform for the students to gain useful practice in working with resistors, capacitors, diodes, and transistors. The laboratory incorporates the theory taught in the classroom and facilitates the students to get the knowledge of the basics of electronics with practical design.

**Chemistry lab:** Possessing an enviable state-of-art infrastructure and latest equipments, the Chemistry lab is best utilized to improve the scientific temper of students. This Laboratory supports learning and understanding the fundamentals of Chemistry with the relevant resources. Effective use of this lab has enabled the students to pursue their studies with enthusiasm.

**Major Equipments:**

Major equipments in physics and chemistry lab are,

- Digital Storage Oscilloscope
- Spectrometer
- Travelling Microscope
- Regulated Power Supply
- Ultrasonic Interferometer
- Band Gap Apparatus
- Hall Coefficient Measurement Apparatus
- Logic Gates Kit
- Conductivity Meter
- Digital Electronics Balance
- Flame Photometer (Model - 381 E) (EI-make)
- Incubater (Inner Chamber 35x35x35 cm)
- Neflometer - VSI - 13 N digit 200 NTV
- pH Meter
- Potentiometer
- Spectrophotometer - Systronics (Model - 105)
- Wash analysis Kit (Model 161 E)
- Mechanical stirrer
- Distillation Unit - DD Water set - 5 lit capacity
- Mechanical Shaker
- Thermostat Ovan
- Oswald Viscometer - Borosil

**Chemistry Research Centre Instrumentation Facilities (CRCIF)**

### SHIMADZU UV-2450 UV Visible Spectrophotometer with Peltier system (10-110 °C)

**Measurements**
- Spectrum (solid and liquid),
- Kinetics (include time course),
- Photometric (include quantization)

**Technical Details**
- Wavelength Slew rate : 3200 nm/min
- Wavelength scan rate : 900-190 nm/min
- Monitor scan rate : 2500 nm/min
- Absorbance : 4-5 Abs
- Transmittance, Reflectance : up to 100%

### JASCO FP-8300 Spectrofluorometer with Peltier system (10-110 °C)

**Measurements**
- Characterization of fluorescent Probe
- Protein dynamics
- Quantitative analysis
- Cellular membrane studies
- Enzyme kinetics

**Technical Details**
- Six-digit dynamic range
- Auto-SCS and Auto-Gain functions
- High sensitivity S/N > 1,600, RMS
- High-speed scanning up to 20,000 nm/min
- Wavelength range, 200 to 900 nm

### SHIMADZU 8400S Fourier Transform Infrared Spectrophotometer (FTIR)
**Measurement**
IR Spectrum (Powder Sample)
PLS quantitation
Curve fitting, Mapping
Macro platform
Pharma Report Program

**Technical Details**

- wave number range: 3,800cm\(^{-1}\) - 350cm\(^{-1}\)
- Measuring Mode: KBR pellet
- Light Source: High brightness ceramic

---

**CHI-Electrochemical workstation with spectrophotometry-620E**

**Measurement**
- Cyclic Voltammetry (CV)
- Linear Sweep Voltammetry (LSV)
- Chronoamperometry (CA)
- Chronocoulometry (CC)
- Differential Pulse Voltammetry (DPV)
- Normal Pulse Voltammetry (NPV)
- Square Wave Voltammetry (SWV)
- Bulk Electrolysis with Coulometry (BE)
- Impedance - Time (IMPT)
- Impedance - Potential (IMPE)
- Open Circuit Potential - Time (OCPT)

**Technical Details**

- Zero resistance ammeter
- Reference electrode input impedance: \(1 \times 10^{12}\) ohm
- Fast waveform update: 10 MHz @ 16-bit
- CV and LSV scan rate: 0.000001 to 10,000 V/s
- Automatic and manual iR compensation

---

**SHIMADZU Liquid Chromatography- LC2010C (HPLC)**

**Technical Details**

- Light source: Deuterium lamp, Low pressure mercury lamp
- Flow rate: 0.001-5 mL/min
- Deep well plates: Max. 4 plates (up to 384 samples with 96 plates)
- Temperature setting range: 4-60 Degree C, 1 Degree C step
- Wavelength range: 190-600 nm
**ONLINE TEACHING RESOURCES**

**Online Teaching Resources:** Our department is fully equipped with online teaching resources such as Wacom, Webcam, HD camera, Document Writer, Head Phone with Mike, Mobile Tripod Stand and White board. With the help of these online teaching resources we can recreate the offline classes in this pandemic situation.
