DEPARTMENT ACTIVITIES

SPECIAL INTEREST GROUP

POWER ELECTRONICS AND DRIVES

A lecture on “**Introduction to Power Electronics & Drives**” was conducted on 17.06.2023 by **Dr.L.Kalaivani, Professor / EEE** for Special Interested Group (SIG) members. The objectives of the session are:

- Introduction to Power Electronics (Power Converters and Inverters)
- Role of Power Electronics in Various Fields
- Recent trends in Power Electronics based Drives and its importance.

Initially she started with the introduction of power electronics and its importance. Power electronics is the field of study that deals with the effective static control, conditioning, and conversion of electrical energy from its available input form to the required electrical output form. Power electronic equipment is used in almost every home, office building, factory, car, hospital, and theatre today. Controlling electric motors is one of the key areas in which power electronics is used.

CONTROL AND INSTRUMENTATION

Control and Instrumentation Special interest group organized a technical discussion for student members of 2021-25 batch on the title “**Introduction to Control & Instrumentation SIG and its opportunities**” on 17/06/2023. **Dr.M.Willjuice Iruthayarajan, Professor and Head/EEE** presented the opportunities and plans for SIG activities for the current semesters. The students visited the lab facilities and an interaction was made by **Mr.M.Sivapalanirajan, AP/EEE** to share the previous year achievements and activities which are useful for the students to plan for the project works with hardware interfacing.

HIGH VOLTAGE ENGINEERING

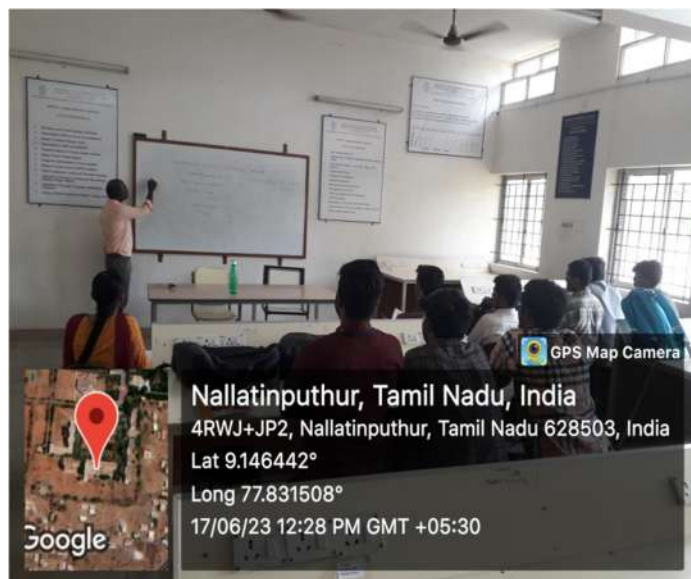

Dr.R.V.Maheswari, Professor/EEE, presented a session on "**Introduction to High Voltage Engineering**" to third-year students in the High Voltage Laboratory. Starting at 11.30 am, the session covered the need for high voltage engineering, the benefits of transmitting voltages at greater levels, the electrical stress placed on the equipment used in high-voltage transmission systems, and other related topics. Then she briefly explained the laboratory test facilities, equipments and the expertise available at the high voltage engineering laboratory. Followed by that she explained how electromagnetic interference and compatibility can damage electronics, leading to failure or malfunction that could have extremely serious consequences.

Followed by that she explained how electromagnetic interference and compatibility can damage electronics, leading to failure or malfunction that could have extremely serious consequences. She concluded by describing the electrical insulation levels of various electrical power system components, such as the transmission network, substations.

POWER AND ENERGY ENGINEERING

The Special Interest Group-Power System and Energy Engineering discussed the topic titled "**An Introduction to Power System**" on 17/06/2023 at the Electronics Laboratory. The class was handled by **Mr.J.Thangaraj, AP/EEE** with the 10 students participants.

The following topics were discussed

- Basic Structure of Power System
- Need for Steady State stability Analysis
- Need for Transient Stability Studies
- Power Factor Correction
- Tool used for simulation

The students came to know the importance of analysis of the Power system. In the upcoming sessions the students will be able to know how to apply in real world simulation
