NEWSLETTER

2K22-2023

Dr. S Shanmugavel

Director

Message

The embers of great minds ignite, cultivate and yield toward betterment and growth of knowledge. The search for evergreen knowledge enlightens the ignorant, dormant and static beings. In the process of working on this newsletter edition creativity, leadership, aesthetics, effective interpersonal skills, teamwork, planning and organizational skills, and excellent communication skills are the qualities long lastingly ingrained in the minds of the students. I appreciate and congratulate the efforts of the young freshmen engineer for rendering a wholehearted commitment to this Newsletter.

Dr. K Kalidasa Murugavel

Principal

Message

Every year the students of the first year display their artistry, eloquence, novelty, and expertise through the array of writings, sketches and snaps, in the biannual editions of the department newsletter. Being a contributor to the newsletter, I am sure that students would have nourished high-minded qualities. I extend my happiness to the first-year students for playing different roles as editors, designers, and content writers for the publication of the newsletter.

Dr. M A Neelakantan

Head of the Department, S&H

Message

The world is filled with opportunities which are gateways for aspiring and exploring minds to discover themselves and it is a catalyst which stimulates to work even better. One such chance is to be a part of the department newsletter; students would have got a chance to develop several of their editorial skills. This newsletter is a mirror which reflects the prowess of the students in the technical and the artistic arena. I wish that our students would march on the path full of success and would keep growing from what they have received from being a part of the editorial team.

Editorial Board Message

From the editorial team, we are exceedingly glad to document the masteries of our freshmen engineers. This edition of the Newsletter is a venture towards the exploration of the hidden talents and skills of the students. The unsaid words and unexpressed ideas of the students, so far, are penned down after refinement and are treasured in this newsletter. It witnesses the knowledge, talent and skills of the students of our Department, Science and Humanities. The accolades and laurels won by the students are also listed. The success of compiling this newsletter is bound with smart work and hard work. Being committed to the responsibility and excited to portray excellence, the students have designed this newsletter with great enthusiasm. Though a reiteration we proudly present the best and valuable information of quality to your hands.

WHO'S GOD

R. Harshline - CSE

It was a bright morning. Beck and his friends were playing in the streets as usual. They roamed around merrily until one of them suggested to play football. Beck's friend Ram kicked the ball hard and they all heard a sound of glass breaking. They all ran away saying it's uncle Loui's house. It was scary for all of them to even let their shadow fall in his area.

Few years ago, Uncle Loui was the friendliest person one could ever meet. He would let children play in his backyard and even join them sometime. It was all fine until his daughter was murdered. We couldn't see him in Church anymore. He's not the same person that we thought we knew.

Lily was new to this neighborhood. After listening to the story about Loui from Beck she was very curious about the murder case of his daughter. Lily was living with her mother and grandmother. Her father died in a protest. She was so proud of her father as he gave his life for a good cause. Her father was an ex-militarian and he worked as a detective until his death. Lily used to follow her dad to work and she had a detective brain just like her father.

"DON'T GO THERE!" shouted Beck, When Lily opened the front gate of Loui's house. Loui was in his chair reading a newspaper. He moved the paper aside to see Lily, with a big smile waving at him "Get out! I hate children" screamed Loui. Lily tried to talk to him but Beck stopped her. "Sorry uncle, she's new here" said Beck and Lily was dragged out of Loui's house.

Lily didn't give up. She tried a lot of ways to get into Loui's house without getting caught. Beck didn't let her in the vicinity of Loui because he knew something she didn't.

Lily's mother Chloe was a very religious woman. She went to church every week and prayed daily. She wanted something big that she knew no one else could give.

Days passed and Lily succeeded in getting close to Loui. She found something common between them. The reason why Loui's daughter was murdered because she saved Beck from

a kidnapper and gave her life instead. As a father Loui couldn't accept this and he hated the sight of children. Lily said that both her father and Loui's daughter are angels who put others before them.They both got very close that Lily would spend more time in Loui's house. One day Lily wore Loui's daughter's childhood dress. It was a white satin dress with lace and pearls. She looked like an angel. Loui had a big smile which he lost a long time ago. Lily swirled around with a wand and that smile of Loui shocked her.

Lily fell and she couldn't breathe. Her mother came running towards her and they rushed to the hospital. Lily's mother explained to Loui that Lily had a hole in her heart and she needs surgery. They shifted the neighborhood that is close to the hospital.

Lily opened her eyes to see Loui standing beside her. She told him, "Don't worry uncle, I would be fine. God is in my heart so it's very strong. My mom told me that God would save and protect me." Loui, who had lost his faith in God a long time ago smiled as he didn't want to break her hope.

The surgery time neared. Lily asked the doctor who's going to operate on her to see how God looks while he sees her heart. She was taken into the operation room.

The pulse meter stopped and the doctor came out saying that he wasn't able to do anything. Loui broke down to tears. He went down to his knees and prayed that "Take myself and save that innocent child".

The doctor went inside the operating room after hearing a beep sound and they worked hard to save her. They tried their best and she was saved.

After Lily gained her consciousness, she asked the doctor how did God look like and he replied, "Just like your uncle Loui". Loui realized that God is the hope that Lily had, the trust her mother had, the tears that he shed and the belief you have that everything will be alright.

EDUCATION

Infant Diksha - IT

EDUCATION**,** this word is very important in each and everyone's life. Without education one's life is empty; there is nothing in this world. For a small amount of work to be done in our home, we need basic education. Nowadays most of the children do not get proper basic education because of their family background or some issues in their family. Most of those children are without their parents. So, they could not get a proper education. Even though with good family background, some parents are not providing proper education.

Education changes one's life totally. Education starts from a small age and continues throughout our lifetime. Education gives a person knowledge, dignity, personality, career and so on. Without education a person is nothing in society.

But most of the people doesn't know without education we can't survive in this world. So, the people lethargically leave the children for some work in industries or some other jobs. So, the children are struggling to overcome their struggles in this society. Not every parent is like this, only a few parents in the village are doing this. In other ways they are forcing the girls to get married soon by stopping their education, but the girls wish to study a lot. In some villages there is no proper transportation. So, in many ways education is stopped for some children.

Even though the generation changes, the condition of education never changes because of social inequalities, family situations etc. These conditions must be changed and everyone in this condition should be changed and everyone in this society must get proper education.

To change these situations, we must take several steps. Everyone must be equally provided with proper education. Every girl child must reach her goals like Police Officers, Engineers, and Doctors and so on.

The government must give free education for the children who are from small towns with challenging family backgrounds. Girls can be forced to get their education but should not be forced to get married. Everyone in this world is born to get proper education. Students should have every facility for their education.

To provide basic education, the government must appoint certain teachers for some small villages and the students must be educated freely without any payments.

The government must organize transport facilities in every village. So that the children can go to any place they would like for their higher education. The students must fly freely in this world without any restrictions.

Every child must learn what he/she is interested in. In many areas, the children are suffering without the basic education. So, the government must create an awareness camp and instruct every person to get educated and no one must be left without education.

Finally, "Education must be given freely to everyone in this society".

LEARNING FROM OBSTACLES

N. Jaya Chithra, CSE

We all have hardships in our life. Whether we like it or not we have to overcome some obstacles and challenges. Overcoming those challenges will allow us to learn new things and will also give us new experiences as Nabil Shalaby said,

"Obstacles that the human face in his life are the only ways and methods of learning."

OPTIONS FOR US

One's life is full of obstacles. It will affect everyone differently from achieving their goals. But remember, "Obstacles do not block paths." All of us have two options regarding obstacles. One is being blocked by those obstacles and the other one is overcoming those obstacles.

OVERCOMING OBSTACLES

The more obstacles we overcome, the more we achieve. But most of us are not adaptive in overcoming obstacles. This will prevent us from some personal and professional growth. It may also prevent us from reaching the result that we desire the most. So instead of cursing those obstacles, try to overcome them. When you do so we would bless the obstacles instead of cursing them.

IMPORTANCE OF OBSTACLES

Obstacles will show our true identity. It will let us know who we are, where we are and how we are capable of achieving our goals. By knowing our capacity, we can work more and improve ourselves to achieve our goal. As Benjamin Franklin said, **"Things which hurt, instruct."**

Obstacles sometimes hurt you but it will instruct you to do things. No one in this world is born with an ability to withstand difficult situations but obstacles will make you tougher and be courageous to withstand those situations.

OBSTACLES AS OPPORTUNITY

"Opportunities can become Obstacles; the same way obstacles can become opportunities." The way we take it is important. The successful people in this world don't reach their positions in a single day. They also face obstacles after obstacles just like a common man but the only difference is he continues to overcome those obstacles having persistence as a key while a common man will give up after two or three times of trying.

LEARNING FROM FAILURES

There are always several ways to overcome obstacles and failures. **"Failure is the stepping stone of success."** The best example for this is Thomas Alva Edison, the inventor of the Electric bulb. He didn't achieve his goal in his very first attempt. It took 10,000 times to attain success. When a reporter asked about this, he said, **"I didn't fail 9999 times, I never failed once, instead I found 9999 ideas that will not work. When I removed those**

ideas, I found an idea that will work." Here, he had learnt from his failures and he had overcome his obstacles.

FILTER FOR SUCCESS

Another great real time example is Elon Musk, the CEO of Tesla, SpaceX and so on is now the richest man in this world. He didn't achieve this position in a single night. He had worked hard and overcame various obstacles in his life even though he is a millionaire today. In his earlier stages he had experienced many hardships. Once, he got rejected in a company and that made him start his own web software company Zip 2. If he had stopped trying like a common man after the rejection, he would not be a millionaire today.

Obstacles are the filter for success. The one who strives to achieve big goals had to overcome many obstacles.

CONCLUSION

Obstacles give meaning to our life. The way we take obstacles as hardships or an opportunity lies in our hand. But remember one thing,

"The Lesson We Take from Obstacles May Become Foundation for Later Success."

Shri Raam P A - AI/DS

WAVES OF TIME

AinoonFaaizah Khan – CSE

The long journey that I have traversed,
Your silver locks that I have caressed,
Narrate the same fable,
To be with you forever, I am not able.
Is it so big a crime,
To want to escape from the clutches of time?
Dragging me away ruthlessly,
While I altercate with it hopelessly.

It never stops to ask,
Persevering on so foreboding a task.
I forbid you Oh time. to take me hostage!
I only desire relief from your bondage.

While I plant my feet firm,
In the shores of life,
Time certainly pays no heed,
To my struggle or strife.

Then with you, oh time, I do make peace,
Certainly, you have brought me,
Down to my knees.
From arguing with you pointlessly, I seize.

Perhaps comfort there is.
In accepting time's pace,
For without times passing,
Devoid life will be of its grace.

Oh my! How you (time) have flown,
Made me realize that I have grown,
Given me fruits,
For the seeds I've sown.
Treasure you (time) I will,
Every moment of my life that you fill.
You, time I will completely spend,
And live my life well before you end.

FOR THE LOVE OF A WOMAN

Nithya Shree R - AI&DS

I met a girl once. We were seventeen. It started like a cheesy Bollywood movie. While returning home, she was being harassed by another man. I saved her. I punched, and kicked him as he fell through a manhole into the sewer. The police arrested him, and I walked that girl back home. She had long, dark hair.

And even darker eyes. Soft, brown skin. And an even softer smile. At that moment, I believed we would last forever. We would fall in love and grow old. And dance, with her head on my shoulder. To fall for a girl is to fall for her eyes, to fall for her cheekbones. It's to watch her when she laughs and count the dimples as they light up. It's to hear her through the phone, her voice a bit electronic but still the sweetest sound, you've ever known. And the day we married was the greatest day of my life. I met her father, her mother. And told them, 'I'm so damn lucky to have her as my wife.' I was hers. And she was mine. And that is how we should've lasted until the end of time. But we didn't... We couldn't... Because one day, she left our house, and never returned.

Later that evening, a call from a hospital said my wife's car had collided and burnt. Then, came her funeral. And I imagine that part doesn't need to be explained. Then came my grief. And it came for endless days. It wasn't the kind of grief I could move on from. It was the kind that made me jealous whenever I saw someone else in love. The grief made me a monster, and I realised I could not live like this any longer. And just as I decided to take my own life, the government needed a volunteer to send back 20 years in time. I accepted.

This was my second chance. I could live my future, by reliving my past. I was taken 20 years back. It is 2001. My age hasn't changed, I am still 31. But she is 11. She is young, with a school bag on her shoulder. The hands that touched me are now smaller, with powder between the fingers. And the mouth that kissed me, was now with a missing incisor. I want to tell her everything. But I know now is not the time. So instead, I decided to wait, and watch her for years together. I am watching a part of her life that I have never seen. I feel this brings us closer together.

Six years later;

She turns seventeen. I fell in love with her all over again. And one night, as she's returning home. I call her by her nickname, and tell her everything I know. I tell her that I'm in love with her, and that I have waited for years. She tries to walk away, but I hold her before. 'You need to believe me. I have never loved you more.' And then she screams, and just as I'm about to show her a photo of us together, I am punched across the face, and kicked into the sewer...

CONCLUSION

This story is about different kinds of love. The love at first sight, the love that causes pain but still not enough to let go the other. My definition of love is being full. Complete. It makes everything lighter. Beauty is something you see. Love is something you feel.

BIOGRAPHY

Archana S – AI&DS

Introduction:

Srushti Jayant Deshmukh (IAS) is an internet sensation who topped UPSC CSE exam in 2019 (AIR-5) in our country. She is the first, among the 180 women who attended the UPSC exam.

About Srushti Deshmukh:

Srushti Deshmukh was born in Bhopal, Madhya Pradesh. Her father Mr. Jayant Deshmukh is an engineer who is working in a Private Company. Her mother Mrs. Sunita Deshmukh is a teacher who is working in a kindergarten. She graduated from Laxmi Narayan College of Technology in Bhopal with a B.Tech in Chemical Engineering (2014 to 2018). She has a younger brother who is pursuing his studies in High School.

Srushti's Education:

Srushti Deshmukh was a top- performing student in her school as well as in her college. She got 93.4% in her Higher Secondary Education. But she failed to score good marks in the JEE exam.

Srushti's Co-curricular & Extra Curricular:

Srushti was an active student in her college time. She got NCC 'A' Certificate and participated in several debates which is a part of the scout. She was involved in a variety of other cultural activities. Listening to music is one of her hobbies. Yoga & Meditation is a part of her daily routine. She has also attended numerous online meetings with LNCT students after passing UPSC.

Civil Service Exam (CSE):

UPSC CSE is the toughest exam in our country. To become an IAS officer has been her dream since her childhood. During her college days, she used to read newspapers, GK Books during her travelling time.

Every day, She used to study 6-7 hours. She secured AIR-5 in the UPSC exam. Followed by KanishakKataria, Ansar Sheikh and Junaid Ahmad. She is the first woman among 180.

Srushti's Optional:

She scored an amazing mark [1065 out of 2025]. Sociology is her optional subject. During her college days, she managed both engineering subjects as well as UPSC subjects.

Srushti's Strategy:

She was on a break for a year to prepare for the UPSC exam. She didn't attend any coaching classes. But She used online sources during her preparation. '**Consistency'** is her strategy. Her parents helped her a lot to achieve her long- term dream. She took several online test series and prepared hand-notes.

Srushti's recent Book Launch:

A month ago, she launched a book called '**The Answer Writing Manual'** in English & Hindi. The book was written by her. She has given many tips & strategies to crack UPSC.

Srushti's Personal Life:

She recently got married to her UPSC batchmate Dr. Nagarjuna Gowda IAS. They both fell in love during their training time at LBSNAA [Lal Bahadur Shastri National Academy of Administration], Mussoorie.

Srushti's Message:

During her preparation, she learnt many life lessons. Her aim is to educate all women, self-sufficient and she stood against child-marriage. She delivered many motivational speeches to young UPSC aspirants.Currently, she is taking charge as SDM Gadarwara of Narsingpur District of Madhya Pradesh.

Conclusion:

Mrs. Srushti Jayant Deshmukh IAS is an inspiration for many UPSC aspirants. She made her life inspirable from failure in JEE to success in UPSC.

THE MAGIC CLOSET

AinoonFaaizah Khan - CSE

"But mom, I don't want to go there!" wailed Tanya tugging at her mother's clothes. "My dear, we promised to visit your grandfather today", replied Tanya's mother coolly. The lush garden with blooming roses, chirping birds and naughty squirrels at her backyard, were much more tempting to Tanya, than her grandfather's quiet, boring abode. A few loving words and some treats were enough to convince the gullible girl somehow.

Half an hour of driving and they reached an old house with walls painted by blooming algae and gates that were rusted and that were never painted back. The girl stepped out of the car and looked around hoping to see something that would captivate her senses.

An old man stood at the gate, his face adorned with wrinkles and he smiled a hearty smile while he opened his arms to the little girl, welcoming her in for a hug. "Grandpa!" the girl shrieked and ran, to be embraced by the loving old man. He lovingly caressed her head and gently guided her and her mother into his house.

The house smelled musty and dreadfully quiet. There was absolutely nothing that could entertain young children and Tanya felt that. Sensing her hesitation, her grandfather motioned for her to come near him. He bent down to her ears and whispered something, which upon hearing, Tanya's eyes widened and her lips parted into an excited grin.

She slowly walked towards the basement which looked as if it hadn't been used for years. The door cracked open to life, revealing an assortment of antique items. But Tanya's attention was somewhere else. She shifted her sight to a wooden closet at the corner of the room.

Her hand slowly stretched out to grasp the knob of the closet door and closing her eyes she quickly opened the door. Her smile diminished slowly as the realization sunk in, there was nothing in there, it was dark and silent inside the closet.

Just when her hopes had sunk, Tanya could feel her hair, suddenly weighing less and felt so odd. Only then did she realize that her feet were not even touching the floor of the closet! Wait a minute, there was no closet around her anymore! She was surrounded by distant dots of bright blue, glaring red and brilliant white, which shone in a never-ending pitch-black horizon.

She looked down to see where she stood and her breath was taken away! She was standing on ice! On literal ice! Somehow except for the place that she stood on there was no ice but only water, endless stretches of water, or so it seemed. She was in space, but more than that, she didn't know.

"How am I going to move from here?" Tanya wondered worriedly. With a sharp inhale she hesitantly stretched out her leg above the water and peaked open one of her eyes. Just below her suspended leg the water had begun to freeze! She now attempted to step on the water, praying that she wouldn't drown. But, Behold! She stepped on solid ice again. The water seemed to freeze whenever something was to be put atop it.

Her fear now lost, she walked atop the glassy ocean and slowly studied its features. There were schools of fish swimming beneath her, brilliant coral captivating creatures that her eyes had never seen! The corals were bioluminescent and lit up the oceans in a breath-taking manner.

A giant and calm mantle ray swam by, beneath her displaying, its width ever so gracefully. But now she wondered, "How would the animals breathe if the ocean were to freeze as such?"

A massive splash interrupted her train of thoughts. She turned around to witness a gigantic whale leaping out of the ocean to get some air and her questions were answered. The ocean allowed its inhabitants for movement across it whereas intrudes like her would not be permitted to explore the underwater wonderland. The whale dipped back and disappeared into the depths of the ocean.

B Kaleeswari -ECE

அன்பை உலகிற்கு அறிமுகப்படுத்தியவள்...
ஆயிரம் பிடியின் உரன் உடையவள்..
இன்சொல்லால் இன்பமுற செய்பவள்..
ஈடு இணையில்லா இமயமானவள்..
உறவுகளையெல்லாம் கடந்து நிற்பவள்..
ஊர் அறிய நம்மை உயரச் செய்பவள்..
எழும் துன்பத்தை எட்டி விரட்டுபவள்..
ஏடு எடுத்து படிக்காத மேதையவள்..
ஐயம் கொள்ளவியலா அரும்பிறவி அவள்..
ஒழுக்கத்தைப் போதிக்கும் ஓப்பற்ற ஞானியவள்..
ஓவியம் தீட்ட முடியாத சித்திரம்அவள்..
ஔவியப்படாத அளவிடற்கரிய அமுதமவள்..
இத்தகைய குணம் நிறைந்தவள் யார் அவள்?
ஆ.்.து அம்புலி போல் ஒளிவீசும் என அன்னையானவள்
அவளுக்காக இருக்கும் தனி உலகத்தில்
அதிகாரியாய் இருப்பது என்னவோ நானே...
அவள் தேவையை யாரிடமும் கூறியதில்லை.
என் தேவையை நான் கூறவேண்டிய அவசியம்..
தான் கற்காத கல்வியை. இன்று
என்னை கல்லூரிக்கு அனுப்பி கற்க வைக்கிறாள
கொட்டும் மழையிலும் எனக்காக குடைபிடித்து நிற்பாள்
அவளும் நனைகிறாள் என்பதை மறந்து
இப்படி அவளுக்காக வாழாமல் எனக்காக
சிந்திக்கும் அவளுக்கு
நான் சிந்திக்கும் முதல் கவிதை!

Education should be Free

Lawanya P – AI&DS

Introduction:

E*ducation is the most powerful weapon that you can use to change the world.* Nowadays, education is not just a part of our lives, it has become our life instead. Educated people are considered as elites and are treated with dignity and power of education. It has become an *indispensable* part of our lives and should be received by all the people of the world at *affordable* costs and without much partiality and discrimination.

Why is education important?

Education is a must for everyone as we are living in a post-modern civilized era. "*Education is the movement from darkness to light." It* makes people mature by helping them to develop a positive approach towards their life. They are highly optimistic and full of confidence. It isn't just learning things from printed materials and writing it for the sake of exams and later on forgetting what one has learnt.

"*Education is something beyond all these. It is the mother of leadership ".* It plays a vital role in developing the character and personality of an individual. Studies state that educated people behave as productive and responsible citizens of the country. Education is the key to knowledge, a life-long learning foundation.

It makes the individual intellectual and they can differentiate the good and bad in everything. They inculcate problem solving skills, decision making skills, and a positive attitude as a result of acquiring proper and quality education from the finest mentors even at an early age. Education is always a *confidence booster.* So, it is inevitable in today's fast-growing world.

Current education system in India:

India is a developing country in education with the state Kerala having the highest literacy rate. It is believed that educated people make a better society without false myths and superstitious beliefs. Under the Right to Education Act, free primary school education is made available to the children of India in the age group of 6 to 14 years.

Though the education system in India is vibrant, effectively producing lakhs of talented people in various fields, it is not fairly distributed. There is significant lagging prevailing between the poor and the rich and between the government and private sectors in India. Even Though many people in urban areas are training themselves for competitive exams with the help of effective technology and coaching classes, children dropping schools even in their primary and secondary grades in rural areas due to various factors also persists on the other hand.

At present, the education system is getting privatized. As a result, the private organizations are fighting healthily in order to provide the best quality education with 100% results but at high costs. Education now has already become a business for the wealthy entrepreneurs. Things are becoming complicated and parents are spending in lakhs to make their child the number one in this competitive world. To achieve this, money isn't a barrier in any way for these wealthy parents. Unlucky are those children born to poor parents who could only afford to join them in government schools.

Unfortunately, government and government aided schools are not on par to private schools collecting fees in large amounts which is totally unfair. Education shouldn't be money-oriented. Education is the basic right of every individual and should be made available to experience world class teaching. It must not be denied to anyone on the basis of gender, caste, race, or religious discrimination.

Need for free education to all:

Education is a necessity in the academic, political, social career of an individual. It is mandatory to all individuals. Money should not in any case become a barrier to acquiring education.

"Education is the art of human ethics." It imparts the characteristics of optimism, hard-work, perseverance, humanity, consistency, helping tendency, confidence, and maturing in an individual. Our government and wealthy people should jointly work and contribute to make the education system and standards the same across the globe.

If education is free,

1. Students will really appreciate this and will develop interest towards studies because it is available to them at free of cost without any financial factors.
2. Students will be relieved as they will be debt-free as their parents needn't apply for education loans in banks or other money-minded institutions which recollect the money from them but with large amounts of interest.
3. Many lives will be saved. Without money, parents force their children to become child laborers in hazardous industries like match factories, crackers etc which will now be abolished.
4. Students will enjoy the sweetness and joy of education to which they are exposed to.
5. Country will develop as a result of qualified people who are mentally and socially aware and responsible citizens.
6. Literacy rates will extremely increase as education must also be given priority equal to medical expenses.
7. Education quality will improve along with infrastructure, smart classes, real-life applications, industrial visits and much more with the money allotted for each category.
8. More and more willing aspirants will enrol for higher studies and research and are able to *identify their goals, pursue their interests and become successful in their lives by achieving their dreams.*

Conclusion:

"Education breeds confidence

Confidence breeds hope

Hope breeds peace."

Thus, everyone must understand the values of an efficient education system and work towards helping everyone experiencing world class education at affordable costs without any discrimination. Our government and wealthy private organizations must work together for this noble cause.

LIFE WATCH

I was made from cells as you,
You are made to run and I too!
We both run in a circular path,
Until our death.

Your hour -hand and journey towards my dream,
Moves very slow than it seems.
Your minute-hand and my situations move without a clue,
Before I get through.

Your seconds-hand and my problems are headache,
That are always active without a break.
Your Centre-nut and my attitude are reliable,
That makes everything stable.
If you stop working, you will be removed from my waist,
If I stop running, would I be in waste,
Or in every heart, until my memory lasts…

IMPORTANCE OF WATER

P Deepa - AI &DS

SYNOPSIS

- Water for life
- Primary source
- Necessary for all life
- Source of water
- Water for commercial purpose
- Water life
- Pollution of water
- Save water

WATER FOR LIFE:

Water is the main source of life without water humans cannot live. The human body is mostly of water content. The fluids in our body make our body organs function properly. Humans cannot live without water for a week. If the body dehydrates, we lose energy and faint. Water is the most important, primary thing to survive in the world. We all know that

Earth is the only planet where life can survive and that's because of the presence of water. So water is the reason why all life can survive. There are many other planets in this universe, but only because of water. We cannot survive anywhere else in this universe. Earth is known as a blue planet because of the presence of water. Without water, we cannot survive in this world.

PRIMARY SOURCE:

We all know that plants and trees are very important to maintain global warming, for oxygen etc., but for trees and plants water and sunlight is the main source of photosynthesis, to prepare their food. From morning to night, we use water for various purposes. If one-day water supply is disconnected, then the whole day will be a complete mess for human beings. In forests, water will be available to the birds, and animals in various forms like ponds, rivers, lakes etc,., so they suppress their thirst by using these water sources. Global warming and dangerous activities by human beings reduce water resources. This makes the animals and birds suffer a lot. They are losing their natural form of water resources. Many plants, birds, and animals are dying as they cannot survive without water and many are roaming inside the human residential areas, which may affect the life of both humans and animals.

NECESSARY FOR ALL LIFE:

We humans know that water is very important for our survival but we are not thinking about that, the water given by the earth is common for all living organisms. Since humans are more powerful with the brain, we are, misunderstanding that the earth is only for humans. Every living organism requires water and they have the equal right to consume water from the earth.

SOURCE OF WATER:

Water includes oceans, ponds, lakes, falls etc. We all know that 71% of Earth's total surface is surrounded by water. Due to heavy rain in the primitive era, only the continents are created in this world. In India, we get our drinking water from rain, river, ponds, lakes etc. Many dams are being constructed to store the water as the water source is not equally distributed throughout the world. Before nature humans are nothing. We may destroy the water resources for our use, but if a cyclone, or storm-like disaster hits us we cannot tolerate its effect. It will be bad if water is available in abundances like tsunamis, cyclones, and storms and it will be the worst condition in drought also.

WATER FOR COMMERCIAL PURPOSES:

The primary source for all-inclusive is water. The food industries use water in abundant not only food industries, but all factories which manufacture brush and rods also require water. For every product we use like brushes, paste, etc. water is necessary. Our humans can develop as much as they can, but they cannot produce a perfect replacement for water.

WATER LIFE:

The main source of water in this world is the ocean. There are millions, billions of life in the ocean. Fishes are living organisms which cannot survive without water for more than 5 mins. Their medium of living is water. But human beings are also destroying the beauty of the ocean with plastic waste, chemicals from industries etc. Water are benefiting humans in many ways but humans in turn destroy their resources. Many industries are not treating their wastes, before mixing them with the water resources. This will not only reduce water availability but also it will make a path to the distribution of human life.

POLLUTION OF WATER:

As much as water is being used by humans, they are being destroyed and polluted by the same human beings. I need to accept the truth that human beings are selfish in using natural resources, not only water every natural resource produced by the earth is being polluted by us. Other living organisms are being distributed by human activities. Plastic is the most important cause of water pollution. Many fishes and organisms inside the ocean and water resources are losing their life. Chemicals from industries are major reasons.

SAVE WATER:

It is also necessary to save water, today we may have pure drinking water but we have to save this most important source for our future generations also, even today many regions of the world are suffering without water. And many are suffering due to cyclones, tsunamis etc. We should be aware of the need for water and should try to save water. We should try to provide this nature gift to the next generation also.

Mahendra Singh Dhoni

R.Sahana - AI&DS

PERSONAL LIFE

Mahendra Singh Dhoni is one of the most famous cricketers in the world. He was born on 7th July 1981 in Ranchi, Jharkhand. He belongs to a middle-class family. His Father's name is Mr Pan Singh. He worked in a junior management position at MECON. His mother's name is Mrs Devaki Devi. He has an elder brother Mr Narendra Singh Dhoni and an elder sister Mrs Jayanti Gupta. His wife's name is Mrs Sakshi Singh Dhoni and his daughter's name is Ziva Dhoni. He loves to play with dogs. He was interested in bike rides. At present, he is settled in Ranchi.

PROFESSIONAL LIFE

Dhoni started his cricket career after 10th grade. He was a Travelling Train Ticket examiner(TET) at Kharagpur railway station from 2001 to 2003 under the south-eastern railway in Midnapur, a district in West Bengal.

After his great hard work, he made his first ODI debut against Bangladesh in 2004. He captained the Indian national team from the year 2007 to 2017. Under his captaincy, India won the inaugural 2007 ICC World Twenty 20, the 2010 and 2016 Asia Cups, the 2011 ICC cricket world cup and the 2013 ICC Champions trophy. His highest ODI score is 183.

In 2008, he become the captain of “Chennai Super Kings”. He is the only player to smash more than 4000 runs as captain in IPL. He was honoured by Padma Bhushan, Padma Shri, Rajiv Gandhi and Khel Ratna.

He is one of the most successful cricketers in the world. He is also known as “captain cool”. He is best known for his “Helicopter shot”. He retired from international cricket in 2020. He is a right-handed batsman and a wicketkeeper.

SOCIAL LIFE

He is the co-owner of Ranchi Rays along with Sahara India Pariwar. Along with Abhishek Bachchan Vita Dani. He is the co-owner of Chennaiyin fc. It is the franchise of the Indian Super League. In 2011, he has conferred the honorary rank of Lieutenant Colonel in the Indian Territorial Army for his contribution to cricket. In August 2019, he completed a two-week stint with the army in Jammu and Kashmir region.

INDUCTION PROGRAM

A.DINESH RAM – CSE

INTRODUCTION:

An Induction programme is a program conducted by the institutions before the regular classes start. According to the norms of AICTE (ALL INDIA COUNCIL FOR TECHNICAL EDUCATION), an induction program must be conducted for 10 or more days to transform the students from school to college life. As I am a fresher at National Engineering College, they had conducted various types of induction programs that helped students in many ways. In this essay, we are going to discuss the induction programs at National Engineering College.

OBJECTIVES OF INDUCTION PROGRAM:

The main objectives for the Induction program are,

- To motivate the students to acquire the skills to that, it is helpful for students to face technical challenges in society.
- To make students feel free, exposed and experience the situations of the college.
- To provide space and time for those students who feel sad because of their family situations, economical situations, and personal and diverse thoughts, and make themselves happy and live peacefully
- To make students self-confident, energetic etc.
-

INDUCTION PROGRAMS:

The College conducted various induction programs some of the programs are

YOGA:-

- Yoga was conducted for students for 14 days to make students stay fit both in their physical and mental health.
- It helped the students free their minds.
- "Pranayama"was given practice to the students which are very useful to keep our minds free, and makes our lungs clean. We felt energetic by practising pranayama.
- Certain asanas like vajrasana, suryanamaskarametc are practised by students.
- Every day, Yoga is conducted for 1:30 hours from 9:30 AM TO 11:00 AM.
-

INTERACTION PROGRAMMES:

Various interactions like Principal interaction, SR. Dean Interaction, Alumni interaction, senior's interaction, and CSE HOD interaction are planned. Our principal DR. K.KalidasaMurugavel gave a brief introduction about the College. DR M.A. Neelakandan shared about the disciplines and how to be at the college. Our college Alumni Dr Ganesh Thirunavukarasu who is working at Tata Consultancy Services(TCS)had an interaction with us.And various alumni shared their experiences about the college. Super seniors who got placed in the top companies shared their thoughts on how to be placed in a company and how to be placed in a company and how to overcome the fear during placement Interviews. They also clarified our thoughts and doubts. CSE HOD talked about the importance of learning technology etc

UNIVERSAL HUMAN VALUES (UHV):

MrSaravanapperumal, Assistant Professor shared the various topics under UHV namely Happiness and prosperity, greeting, self–confidence, how to overcome fear etc.

STAGE YOUR TALENTS:

Students who performed well in singing, dancing, solving puzzles, playing music etc are asked to show their talents on the stage to overcome fear, make the audience cheerful etc.

OUTCOME-BASED EDUCATION (OBE):

Outcome-based Education is useful to students since it incorporates the needs of the students and ensures placements in good companies. Orientation toOutcome Based Education is given to us.

SPORTS:

Sports make students stay fit in physical health. Sports like cricket, football, hockey, basketball, volleyball etc.., are given practice inside the college. The sports were conducted for 1:30 hours. It was very useful to students and made them happy.

CONCLUSION:

The induction program organized for us made students feel happy, energetic, self-confident etc.., so I thank the college for conducting the induction programs.

EDUCATION SHOULD BE FREE

G. Brahma Sakthieswari - CSE

INTRODUCTION:

Education is the most powerful tool that anyone can have but nowadays, it is governed by corruption. Education has become a business rather than a service. Every citizen in a country needs to be educated. Still, there are circumstances, which do support people financially.

The word education has its meaning from the Sanskrit "SHIKSHA"**,** which means learning. Education is the process of learning and teaching. So, everyone should know the importance of learning to create society a better place to live.

Educated citizens are considered to be productive citizens. These educated people will let the country on the right path.

FREE EDUCATION:

Education has become a vital thing in this modern era. Even though people started realizing the importance of education, there are a lot of people who are struggling to get a proper education. They are facing struggles like poverty, the unwillingness of parents, health issues and many more**.** The most unacceptable struggle is poverty. Because "Poverty" can never be a struggle for a child for getting educated ad it is not a mistake which is made by that child. Nowadays, institutions are collecting a large amount in the name of tuition fees. Not everyone can afford such a big amount of money. According to the 81A Amendment Act 2002, from article 21A**,** "A state should provide free education for the children from age of 6-14".

Based on this if a state is failed to be given a free education, then the constitution will take some severe action. People are forgetting that "Education is a service, not a business". Education should be given based on educating people not on basis of earning profit. Giving free education to people can help them learn without any obstacles.

IMPORTANCE OF FREE EDUCATION:

Providing free education to needy people can make them learn peacefully, without worrying about the tuition fee. It even makes them more responsible not to take free education for granted. Education is the only wealth that can never be destroyed or erased by an individual. There is a saying in Tamil that "One can wash off all of their sins by giving education".

Everyone getting an education should learn it to give it back to others who are in need. If society is educated then it can make the country more developed. Research says that "The country which has given primary education to all has created people with innovation and creativity".

EFFECTS OF FREE EDUCATION:-

Though giving free education can help an individual to make their life sophisticated, there are also lots of people who are taking that for granted. People will not consider that as a treasure rather they waste the honour of getting free education. Our government has taken a lot of

effort to provide free education. But the parents of this generation are not considering Government schools as a worth. They are pulling their children into English medium or CBSE School. It is not an issue but the government should become good in infrastructure and teaching also. All the teachers of government schools should consider the students as their children and give them all the education needs.
