ANY OTHER ITEMS, WITH THE PERMISSION OF THE CHAIRMAN OF THE ACADEMIC COUNCIL

- One of the Industrial expert made an open announcement in the meeting with the permission of Chairman of Academic Council, to encourage the students to do post graduation and it was well appreciated by all the members of Academic Council.

The expert from the Industry "Tessolve Semiconductor Solutions Private Limited, Bengaluru" made an announcement that his industry is ready to support **four students** who are choosing **Post Graduate degree programme at NEC** with the scholarship amount of **Rs.50,000/-** for each student.

Points suggested by the Academic Council members

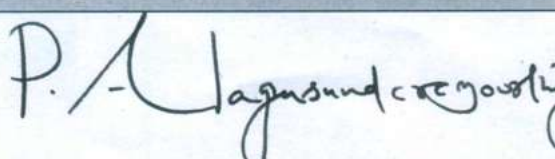

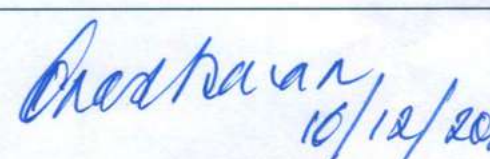

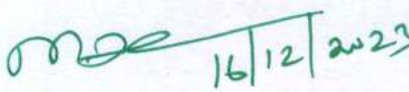

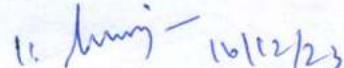

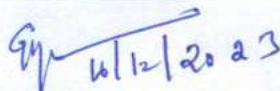

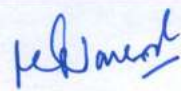

1. Integrated curriculum introduced in Regulation 2023 is a good initiative, challenging task with implementation difficulty. Constant effort is needed both from administration and faculty members to bring quality in Teaching Learning Process.
2. To teach integrated courses with expected outcome and quality, more number of faculty members are required. Professor of practice (full time) may be appointed. These professors may be from Industries, abroad universities and reputed institutions in India.
3. Proper feedback mechanism shall be devised to get feedback from the students and faculty members about the teaching learning process through integrated curriculum to improve the quality of education
4. Faculty members shall be encouraged to participate and present their research articles in conferences organized by reputed Institutions
5. Series of quality workshops shall be organized at college to improve the quality of faculty members
6. Number of students appearing for GATE and getting score is less at NEC. So proper strategy plan shall be articulated to motivate the students.
7. Quite happy about NPTEL success rate of students as well as faculty members
8. Lot of international certificate courses for AI& DS and other emerging area are available. Faculty members and students shall be encouraged to do such courses.
9. Problem solving skills of faculty and students should be improved. If problem solving skills are improved then getting a GATE score or getting placement may not be a difficult task for the students
10. ACM, Elsevier, IEEE professional chapters shall be formed exclusively for women. Provision for this is available in all professional societies.
11. NEC mission objective mostly seems to be placement driven. Importance may be given for other objectives such as getting GATE score and entering into PSU, academic excellence and getting into M.S / M.Tech / MBA Post Graduate Programmes. Proper road map may be prepared to meet out the career settlement of the students.
12. Students shall be motivated to do post graduate degree programme and take teaching as their profession. Otherwise in due course finding qualified, sincere teachers may become a difficulty to all academic Institutions.
13. In Mechanical Engineering, for the Course titled "Engineering mechanics" - one more Text book titled "Engineering Mechanics (in SI units) by Timoshenko, DH young, J V Rao, Publisher - Mc-Graw-Hill" shall be added.

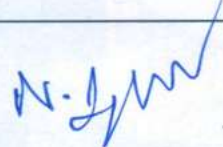

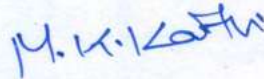

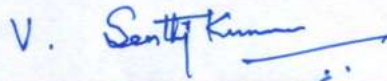

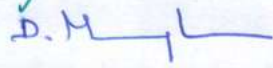

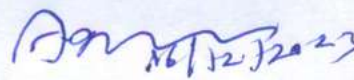

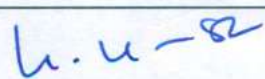

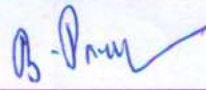

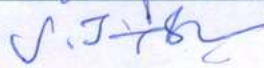

14. In Electronics and Communication Engineering, the Artificial Intelligence and Machine Learning course introduced as a core course in VI semester of UG degree programme is a good initiative and this course shall be handled by a subject expert from CSE/IT/AI&DS or from the same department.
15. Courses such as Disaster Management, Emergency management, Common Sense Engineering shall be introduced in R-2023 curriculum.
16. Experiential learning introduced in R-2023 curriculum is appreciated. Steps may be taken to improve peer learning, group learning, problem solving skills. Societal problems may be considered and students may be motivated to provide solutions to such problems.
17. The assessment process for Internship course introduced in the curriculum may be properly articulated and feedback may be collected from the industry mentors/reporting manager at Industry.
18. A lot of online materials are available on framing Course Outcomes, implementation of OBE. Faculty members are advised to make use of the materials and equip themselves.
19. Members suggested that the number of program outcomes for Undergraduate Engineering programme shall be maintained as twelve as specified by NBA.
20. Adequate number of training programme shall be arranged for the faculty members to teach Integrated Curriculum R-2023 to the students. (Teaching a conventional mathematics course / Engineering course is different from teaching an elective course on mathematics / integrated Engineering Course. Unless the faculty members are properly trained to handle integrated courses, the implementation of R2023 curriculum structure may be a challenging task.)
21. The members appreciated the efforts taken by the college for the remarkable placement records for the 2019-23 batch and 2020-24 batch.
22. The members suggested that a proper strategy plan may be prepared by considering placement in reputed companies, PSU, Higher studies and Entrepreneurs for the next 3 years and presented in the next AC meeting.
23. The student members of the ACM expressed their suggestions / feedback
 - ✓ Oral and written presentation skills of students to be improved
 - ✓ Awareness for GATE needed
 - ✓ Industry experts appointed as Adjunct faculty in the college is useful to know about the industry scenario and the skills needed for industries
 - ✓ German language classes initiated at college is very useful

Finally **Dr.K.Mohaideen Pitchai**, Professor / CSE thanked all the members for their fruitful discussion and valuable suggestions and the meeting came to an end.
